Volunteer Experience

Traffic Survey Associate at   Traffic & Transportation planning Services
May 2008 - July 2008

   With the rapid pace of urbanisation, cities are emerging as potential markets and as a result large scale
   developments are in demand. Any such development can impact the surrounding roads by adding more
   vehicles to existing traffic or altering traffic patterns altogether. In addition to designing appropriate access
   for the proposed developments, planners and developers should strive to maintain a satisfactory level of
   transportation service and safety for all road users.

   Traffic access and impact studies gather and analyze information that will help determine the need for any
   improvements to interior, adjacent, and nearby roadway systems.

Helpmate at   Hyderabad International Machine Tool Expo at Hitex Exhibition Centre
May 2009 - July 2009

1 person has recommended Lakshman

"Lakshman, is an incredible blend of HTML code genius, team empowerment, innovative design and UI/ UX Web Developer at Esolvit, Inc. He is a great asset to Company and Esolvit product development team. I always enjoyed working with him. His thirst for knowledge and passion to learn more only propels each project that he works on. His mind is constantly thinking of the next best way to complete a task or meet a goal more effectively. As a young creative he also has an amazing ability to stay disciplined in enhancing his skills and staying focused on each task at hand. He is truly a leader in the next generation of out of the box creativity and problem solving. "

— **Usha Boddapu**, *CEO/Co-Founder, Esolvit Inc*, managed Lakshman at Esolvit Inc
